EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert Mueller on 1 December 2004.

The application has been amended as follows:

In the claims:

Claim 40 is cancelled.

Allowable Subject Matter

2. Claims 1-39 are allowed.
3. The following is an examiner's statement of reasons for allowance: The prior art of record neither anticipates nor renders obvious a cutting tool (independent claim 1) or indexable tip for a cutting tool (independent claim 18) as claimed, specifically wherein "a thickness of said indexable tip from said support surface to upper extents of said acute corner angles opposite said support surface is greater than a thickness of said indexable tip from said support surface to upper extents of said obtuse corner angles opposite said support surface" (claim 1) or wherein "a vertical distance from said supporting area to said cutting edges located at said obtuse-angled corners is less than a vertical distance from said supporting area to said cutting edges located at said acute-angled corners" (claim 18).

Art Unit: 3722

The closest prior art of record is WO 98/51438 (US Pat. No. 6,224,300, Baxivanelis et al.) which is discussed in detail in the previous office actions.

Baxivanelis teaches the obtuse corner as claimed, but does not disclose wherein "a thickness of said indexable tip from said support surface to upper extents of said acute corner angles opposite said support surface is greater than a thickness of said indexable tip from said support surface to upper extents of said obtuse corner angles opposite said support surface" (claim 1) or wherein "a vertical distance from said supporting area to said cutting edges located at said obtuse-angled corners is less than a vertical distance from said supporting area to said cutting edges located at said acute-angled corners" (claim 18).

Therefore Baxivanelis does not anticipate the claimed invention of independent claims 1 or 18.

Furthermore, there is no prior art of record, either alone or in combination with Baxivanelis, that teaches the obtuse corner as claimed, and no motivation found to modify Baxivanelis to obtain the claimed invention of independent claims 1 or 18.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
